Contents

Preface vii
Contents ix

Section 1. Glass structure I

The structure of tellurite glass: a combined NMR, neutron diffraction, and X-ray diffraction study
J.C. McLaughlin, S.L. Tagg, J.W. Zwanziger, D.R. Haeffner and S.D. Shastri 1

Modifier coordination and phosphate glass networks
R.K. Brow, C.A. Click and T.M. Alam 9

Section 2. Optical properties I

Recent developments in chemical sensing using infrared glass fibers
S. Hocdé, C. Boussard-Plédel, G. Fonteneau, D. Lecoq, H.-L. Ma and J. Lucas 17

Photodarkening in Ge_3Se_{17} glass
C.R. Schardt, J.H. Simmons, P. Lucas, L. Le Neindre and J. Lucas 23

Section 3. Glass structure II

Preparation and structure of amorphous solid electrolytes based on lithium sulfide
M. Tatsumisago, H. Yamashita, A. Hayashi, H. Morimoto and T. Minami 30

Monte Carlo simulations of phosphate polyhedron connectivity in glasses
T.M. Alam 39

Section 4. Optical properties II

Hypersensitive transition $^3P_0 \rightarrow {}^3F_2$ of Pr^{3+} related to the polarizability and structure of glass host
V.K. Tikhomirov and S.A. Tikhomirova 50

Energy transfer and 1.3 μm emission in Pr–Yb codoped tellurite glasses
S. Tanabe, T. Kouda and T. Hanada 55

Controlling the optical constants of thermally-evaporated $Ge_{10}Sb_{30}S_{60}$ chalcogenide glass films by photodoping with silver
E. Márquez, T. Wagner, J.M. González-Leal, A.M. Bernal-Oliva, R. Prieto-Alcón, R. Jiménez-Garay and P.J.S. Ewen 62

Calculation and simulation of spectroscopic properties for rare earth ions in chloro-fluorozirconate glasses
K. Soga, H. Inoue and A. Makishima 69

Judd–Ofelt analysis and luminescence property of Tm^{3+} in Ga_2S_3–GeS_2–La_2S_3 glasses
K. Kadono, T. Yazawa, M. Shojiya and Y. Kawamoto 75

Section 5. Glass structure III

Glass structure and light scattering
B. Champagnon, C. Chemarin, E. Duval and R. Le Parc 81

Section 6. Nanoparticles

Absorption and Raman scattering spectroscopies from semiconductor–glass composites
T.J. Bukowski, T.M. Neidt, R. Ochoa and J.H. Simmons 87

Section 7. Glass structure IV

Fragility of liquids using percolation-based transport theories. Correlation between limiting slope of the viscosity and non-exponentiality of relaxation
A.G. Hunt 93

The structure of aluminate glasses by neutron diffraction
A.C. Hannon and J.M. Parker 102

Structure and properties of low-silica calcium aluminosilicate glasses
L. Cormier, D.R. Neuville and G. Calas 110

Section 8. Glass properties I

In situ high-resolution X-ray photoelectron spectroscopy of light-induced changes in As–Se glasses
H. Jain, S. Krishnaswami, A.C. Miller, P. Krecmer, S.R. Elliott and M. Vlček 115

Property extrema in GeAs sulphide glasses
B.G. Aitken and C.W. Ponader 124

Section 9. Glass transition and relaxation behavior

Bond lattice or excitation model analysis of the configurational entropy of molecular liquids
C.T. Moynihan and C.A. Angell 131

Stress–strain relation of entangled polymer networks
G.S. Grest, M. Pütz, R. Everaers and K. Kremer 139

Section 10. Nucleation and crystallization I

Kinetic model for nucleation in partitioning systems
K.F. Kelton 147

Section 11. Glass transition and relaxation I

Is the susceptibility minimum of glass-forming liquids due to the β-relaxation of the mode coupling theory or caused by the ubiquitous constant loss?
K.L. Ngai 155

Section 12. Nucleation and crystallization II

Adiabatic nucleation in supersaturated liquids
E.M. de Sá, M.F. da Silveira, E. Meyer and V. Soares 162

Crystallization of SiO_2–TiO_2 glassy films studied by atomic force microscopy
A. Karthikeyan and R.M. Almeida 169

Nucleation behavior of Na_2O–SiO_2 glasses with small amount of additive
T. Wakasugi and R. Ota 175

Section 13. Glass transition and relaxation II

Relaxation of non-crystalline solids under mechanical stress
C. Gauthier, J.M. Pelletier, L. David, G. Vigier and J. Perez 181

Section 14. Nucleation and crystallization III

On the persistence of metastable crystal phases in lithium disilicate glass
L.L. Burgner, P. Lucas, M.C. Weinberg, P.C. Soares Jr. and E.D. Zanotto 188

Compositional onset of homogeneous nucleation in (Li, Na) disilicate glasses
J. Deubener 195
Effect of devitrification on the ionic diffusion of Li-disilicate
O. Kanert, R. Küchler, D. Suter, G.N. Shannon and H. Jain 202

Section 15. Phase transformation kinetics I

Surface crystallization of silicate glasses: nucleation sites and kinetics
R. Müller, E.D. Zanotto and V.M. Fokin 208

Section 16. Phase transformation kinetics II

Non-linear optical properties of chalcogenide glasses measured by Z-scan
F. Smektala, C. Quemard, V. Couderc and A. Barthélémy 232
Nano-scale glass formation in pyrochlore by heavy ion irradiation
S.X. Wang, L.M. Wang and R.C. Ewing 238
High pressure densification of lithium silicate glasses
N. Kitamura, K. Fukumi, H. Mizoguchi, M. Makihara, A. Higuchi, N. Ohno and T. Fukunaga 244
A kinetic study on non-isothermal crystallization of the glassy alloy $Sb_{0.16}As_{0.43}Se_{0.41}$
P.L. López-Alemany, J. Vázquez, P. Villares and R. Jiménez-Garay 249
Materials design and example of long lasting phosphorescent glasses utilizing electron trapped centers
T. Kinoshita and H. Hosono 257
On the interpretation of the experimental Raman spectrum of β-eucryptite $LiAlSiO_4$ from atomistic computer modeling
R. Sprengard, K. Binder, M. Brändle, U. Fotheringham, J. Sauer and W. Pannhorst 264

Section 17. Metallic glasses I

Amorphization and alloy metastability in undercooled systems
J.H. Perepezko and G. Wilde 271

Section 18. Glass properties II

Effects of MeV energy titanium ion implants on the oxygen related defects centers in silica
R.H. Magruder III, R.A. Weller, R.A. Weeks, R.A. Zuhr and D.K. Hensley 282

Section 19. Metallic glasses II

Electronic structure of Pd-based bulk metallic glasses
F.M. Alamgir, H. Jain, R.B. Schwarz, O. Jin and D.B. Williams 289
Investigation of specific heat and thermal expansion in the glass-transition regime of Pd-based metallic glasses
I.-R. Lu, G.P. Görler, H.-J. Fecht and R. Willnecker 294
Physical properties of bulk amorphous glasses: influence of physical aging and onset of crystallisation
J.M. Pelletier, J. Perez and J.L. Soubeyroux 301

Section 20. Glass properties III

Connection between the microwave and far infrared conductivity of oxide glasses
S. Krishnaswami, H. Jain, E.I. Kamitsos and J.A. Kapoutsis 307
Electronic transport and optical properties of proton-implanted amorphous $2CdO \cdot GeO_2$ films
S. Narushima, H. Hosono, J. Jisun, T. Yoko and K. Shimakawa 313

Section 21. Computer simulations I

'Strong' and 'superstrong' liquids, and an approach to the perfect glass state via phase transition
C.A. Angell, C.T. Moynihan and M. Hemmati 319

Computer simulations of undercooled fluids and the glass transition
K. Binder 332
Spatially heterogeneous dynamics in liquids: insights from simulation
S.C. Glotzer 342
Simulations of metastable decay in two- and three-dimensional models with microscopic dynamics
M.A. Novotny, P.A. Rikvold, M. Kolesik, D.M. Townsley and R.A. Ramos 356

Section 22. Computer simulations II

Interplay between electronic and atomic structure in expanded fluid potassium: a path-integral molecular dynamics study
P.A. Deymier and K.-D. Oh 364

Author index 373
Subject index 377
